

INDUSTRIAL FILTRATION UNITS

FILTRATION UNITS IEG

- ▶ robust construction for harsh conditions
- ▶ high efficiency (up to 99.9%) with the possibility of recuperation
filtered air = significant savings in heating costs
- ▶ output up to 5000 m³/h
- ▶ automatic cleaning of filter cartridges
- ▶ frequency converter - power can be varied

AREAS OF APPLICATION

- ▶ Burning and cutting workplaces
(thermal cutting of metal with lasers, plasma, autogens)
- ▶ welding and grinding shops
- ▶ robotic welding workstations and more

ADVANTAGES OF IEG UNITS

- ▶ Czech product
- ▶ robust and reliable construction and top quality components
- ▶ economical operation with the possibility of recuperation
- ▶ automatic operation including cleaning cycle
- ▶ easy and clean handling of waste material
- ▶ remote monitoring and support
